The magical essence of natural landscapes since the dawn of man have been a source of intrigue, wonder and inspiration in art, philosophy and literature. With each new era in civilisation, new methods of creative expression have been used by artists, designers and writers to capture the rich natural landscapes, and with the 21st century and the emergence of new interactive technologies, this innate desire is being expressed through the digital domain. From the giant mushroom forests of Morrowind, the Archipelago islands of Zelda: Wind Waker, to the tropical underground caves of Phantasy Star Online, Virtual landscapes have enthralled, captured and engaged player imaginations for over 30 years. Virtual Landscapes is a three part series attempting to, for the first time, visually illustrate, share and critically reflect upon the unique, virtual natural landscapes within Computer & Video Games. Virtual Landscapes: The Modern Era visually illustrates the revolution in complexity and richness of virtual natural landscapes that occurred in computer & video games from 2000 to modern day. From the tranquil landscapes of Morrowind, the rolling forested autumn hills of Oblivion, the eerie landscapes of The Witcher, through to the beautiful deep crimson Maple forests of Phantasy Star Universe, the vast epic landscapes of Skyrim, and finally to the lonely landscapes of Dear Esther, Virtual Landscapes presents these virtual spaces for the first time, in stunning unseen digitally enhanced. high resolution and panoramic forms.
